SCHOOL HOLIDAY TRAINING

Website Design & Development

A three-level practical programme to design, build and develop professional websites with WordPress.

Programme Overview

A practical, hands-on training programme for students and young learners to gain real website design and development skills during the school holiday.

For learners aged 15+

Runs in school-holiday cohorts

Hands-on, project-based learning

Training Pathway & Fees

A progressive, three-level programme. Enrol for one level at a time, with a clear learning path from beginner to advanced.

Level 1: Website Creator

Start from zero and build a complete website with no-code/low-code tools.

7 Weeks
(≈ 21 Sessions)

UGX 500,000

Level 2: WordPress Developer

Build dynamic, CMS-powered websites with customization.

6–7 Weeks
(≈ 18–21 Sessions)

UGX 750,000

Level 3: WordPress Engineer

Advanced development: custom themes, plugins, integrations and more.

6–7 Weeks
(≈ 18–21 Sessions)

UGX 1,000,000

How the Training Runs

A structured, practical learning rhythm with three instructor-led sessions each week.

Session 1

Introduce concepts and demonstrate the week's tools.

Session 2

Guided hands-on workshop with trainer support.

Session 3

Practical challenge, troubleshooting, review and feedback.

Session Duration: 2–3 hours

Weekly practice tasks & a final project at the end of each level.

LEVEL 1

Website Creator

From little or no experience to planning, building and publishing a responsive website using WordPress and Elementor.

Duration
7 Weeks
(≈ 21 Sessions)

Ideal for
Beginners
(15+)

Focus
No-code / low-code website creation

LEVEL 2

WordPress Developer

Build dynamic, CMS-powered websites with customization, added functionality and best practices.

Duration
6–7 Weeks
(≈ 18–21 Sessions)

Entry Level
Basic website knowledge
(e.g. a published site)

Focus
WordPress, customization and site management

LEVEL 3

WordPress Engineer

Advance to professional WordPress development with custom themes, plugins, integrations and real-world solutions.

Duration
6–7 Weeks
(≈ 18–21 Sessions)

Entry Level
Good WordPress experience and site management

Focus
Custom themes, plugins, APIs and integrations

AI in the Programme

- Use AI tools to plan, design and create content.
- Generate and optimize website copy (SEO-friendly).
- Create images and visuals for websites.
- Speed up design and learning through AI assistance.

Learning Outcomes

By the end of each level, you will have a working project, practical skills and the confidence to build real-world websites.
